## PROJECTS

**foodZap.com** | **•LIVE▶** | 

**TechStack : CSS3 | JavaScript | React | Node.js | Express.js | MongoDB | JWT | Stripe**

- Developed FoodZap, a full-stack web application that enhances online food ordering with a user-friendly interface and robust frontend & backend capabilities.
- Implemented user features including registration, login, menu exploration, cart management, order processing with delivery information, and secure payment via Stripe.
- Enabled users to view and track their orders, manage account details, and securely logout.
- Built comprehensive admin functionalities for adding, listing, and managing food items, as well as tracking and updating order statuses.

**bookStore** | **•LIVE▶** | 

**TechStack : CSS3 | JavaScript | React | Node.js | Express.js | MongoDB | JWT**

- Developed a secure BookStore website with user authentication, enabling users to register, log in, explore an extensive book collection, change themes using Context API, and access a specialized course book list for registered users.
- Implemented a contact page for user inquiries and ensured seamless experience with logout functionality, enhancing user interaction with customizable browsing and secure access to book listings.
